Adani Foundation sets up modern computer lab at Ayodhya Gurukul

TNN | Aug 26, 2026, 11:40 PM IST

Ayodhya: A modern computer lab has been established at Ayodhya's Shri Nishulk Gurukul Mahavidyalaya as part of an initiative by the Adani Foundation.

The initiative is an important step toward connecting the traditional Gurukul education system with modern technological resources.

In April 2026, industrialist Gautam Adani visited Ayodhya with his wife and Adani Foundation chairperson Priti Adani, his son Karan Adani, and his daughter-in-law Paridhi Adani. The family offered prayers and sought the blessings of Ram Lalla at Ram Temple. Adani then visited Shri Nishulk Gurukul Mahavidyalaya in Ayodhya, where he interacted with teachers and students.

During the visit, the students expressed their desire for a modern computer lab. Fulfilling the request, the Adani Foundation established a state-of-the-art computer lab at the Gurukul. Gautam Adani expressed happiness over the initiative by sharing a video on X.

“It is extremely gratifying to see the students of Shri Nishulk Gurukul Mahavidyalaya connect with technology

through a modern computer lab. Being able to fulfil a small wish of students is a matter of immense joy for me," he said.

He described the initiative as an effort to build a bridge between India's ancient knowledge tradition and the digital age. He said the objective was to provide the younger generation with new opportunities for education and knowledge while keeping them connected to their cultural roots.
